Furaffinity, Deviantart, and hs2012

As of December 2018 the hs2012 Furaffinity is mostly blank and hidden from anyone who is not a registered member. However, thanks to the Wayback Machine, we were able to find an older version of the page from April 2015 when it had significantly more information about its owner. Please be aware that the following link leads to pornographic art content and is not safe for work.

When trying to access the hs2012 Inkbunny account you will be redirected to the voluptuousvenessa account. This is due to Parker changing the name of the account, likely in an attempt to hide it along with blocking guest access (this also prevents us from archiving the main page of the account). Inkbunny, however, keeps a record of name changes, and if you try to access an account using an old username it will automatically redirect to the account’s most current username. Name changes are also viewable through the member search function.

Further evidence that hs2012 of FA and voluptuousvenessa of IB are the same person can be seen in the shouts and Watched By list.

People refer to voluptuousvenessa as James.

- The black and neon teal color scheme hs2012's fursona Xeno The Hedgehog is nearly identical to the color scheme in the avatar Parker uses for his Steam account. Parker has used this avatar since at least 2013.

Is This Faked?

No. Web archives cannot be changed or altered, and we do not have the technical know-how to hack websites. Even if we could we would not. We respect the work of The Wayback Machine and would not risk their reputation just to accuse a D-list YouTube cringe content creator of being into cartoon animal kids.
It is also extremely unlikely this was a long con by people who hate Parker. These accounts date back to 2011. Parker didn't gain popularity and notoriety until late 2017, as can be seen on his Socialblade and in Twitter activity.

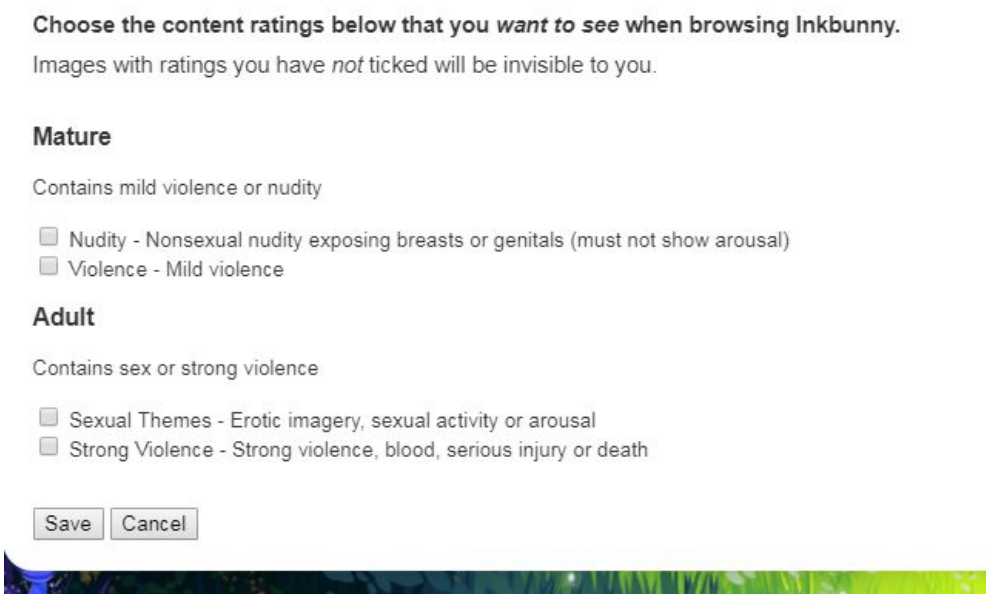
We are not the creators of the original hs2012 Wayback Machine archive, nor do we know who made it.

What About Inkbunny's Filters?

One might argue that Parker could have the Mature and/or Adult filters enabled on his Inkbunny account, and therefore had no idea the accounts he was following were posting explicit content of underage characters.



Choose the content ratings below that you want to see when browsing Inkbunny.
Images with ratings you have not ticked will be invisible to you.

Nudity - Nonsexual nudity exposing breasts or genitals (must not show arousal)

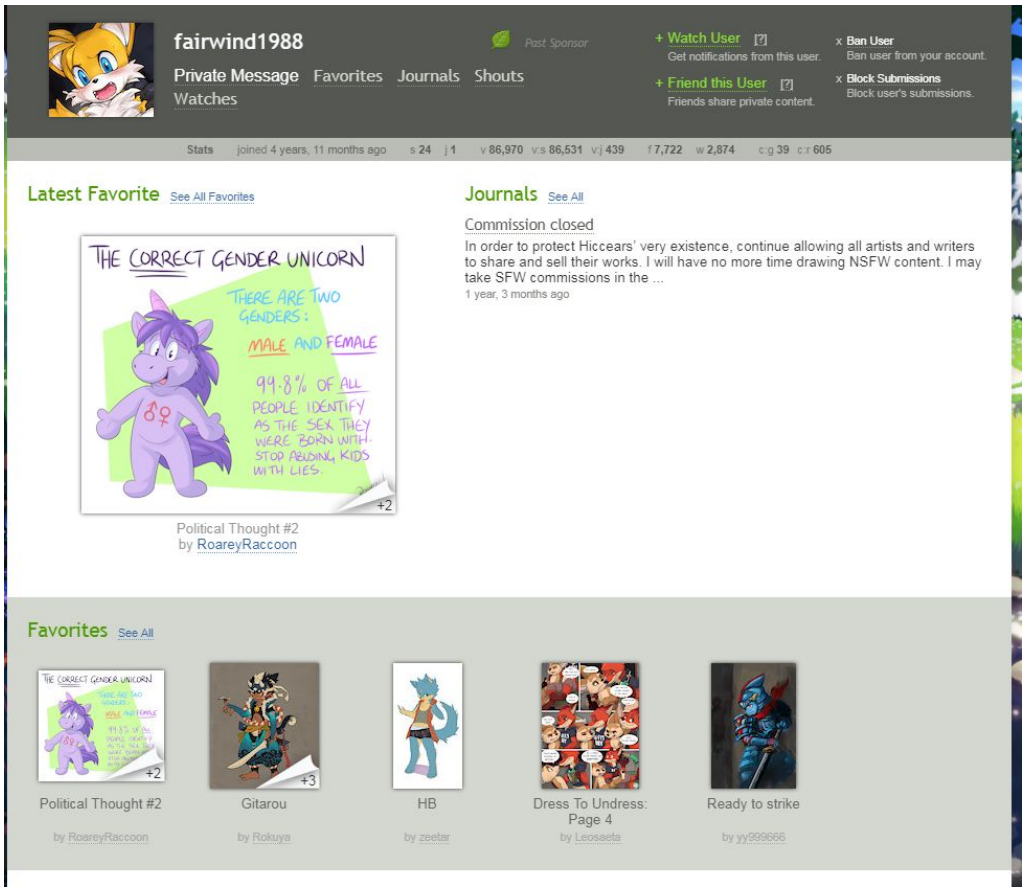
This is highly unlikely. We will prove this using two of the cub artists he follows, Fairwind1988 and Wuwu.

If you try to access Fairwind1988's account with both Mature and Adult filters enabled, they appear to have no gallery.



Fairwind1988 does not appear to be a friend of Parker. They do not follow him back on IB and have zero public interactions with him. Therefore, there would be no reason for Parker to follow Fairwind1988's account if he had both Mature and Adult filters enabled.
If you try to access Fairwind1988's account with the Adult filter enabled, but allow Mature content, then their gallery shows 5 pieces. All are tagged as "cub" and are pornographic.

Next is the artist Wuwu. Even with both Mature and Adult filters enabled the pieces in the gallery, all of which are tagged "cub," is blatantly suggestive 'pin up' style art where it is meant to titillate and arouse without showing outright nudity. Pieces depict underage characters in bondage or are given titles such as "make some creams~".
